

## Virtual CISO (vCISO)

Expert Cybersecurity Leadership On  
Demand Without the Full-Time Cost

### ABOUT THE Virtual CISO

In today's dynamic threat landscape, robust cybersecurity leadership is essential for businesses of all sizes. However, hiring a qualified Chief Information Security Officer (CISO) can be challenging, especially for growing organizations.

A Virtual CISO (vCISO) offers the executive-level expertise and strategic guidance of a seasoned security leader without the overhead of a full-time hire. It's like having a fractional CISO, providing the same level of knowledge and experience with a flexible and cost-effective approach.

### WHY

### CHOOSE BisonCyber vCISO?

- ✓ **Proven Experience and Expertise**  
7+ years of experience serving customer globally
